2015 Lighthouse Night

By Todd Moen

The 2015 Lighthouse Night had a great crowd along both sides of the center pond and the weather was fantastic! This newsletter is entirely devoted to that evenings photos.

COMMODORE'S CORNER

By **John Bertelsen**

The club provided boating/ sailing for the Centennial Lakes Tenants

Association luncheon. This occurred on the south pond, which I'll bet many people have not tried. It is a very different experience from the middle or north pond. Each pond has its own character. The south pond is more like being on a natural lake. The wind was very good the day of the luncheon so you could set your sails and really let the boat go for a long time. I was also running our tug boat over to the opposite shore. The south pond differs from the north pond in that the entire perimeter is concrete wall, no need to worry about getting caught in cattails, or trying to retrieve your boat from the cattails. Both north and south ponds are much larger than the center pond and it is very different to let your craft get wayyyyyyy out there rather than the much closer perimeter limits of the middle, social, pond. Also, right now anyway, the north pond still is inundated with the suspended vegetation floating around, whereas the south pond is pretty much vegetation free. Consider trying out one of the other ponds. -John Bertelsen

5TH ANNUAL FALL RIVER CRUISE
